Bus: ☐ No ☐ Yes		Bus #:	504/IEP: ☐ No ☐ Yes
Allergen(s)			
Allergic to:			
Typical symptoms:			
History of anaphylaxis: ☐ No ☐ Yes		If yes, epinephrine given: ☐ No ☐ Yes	
Most recent severe reaction (mm/yy):			
Asthma: ☐ No ☐ Yes (if yes, high risk for severe reaction, please also complete asthma action plan)			
Emergency Action Plan:			
Yellow: mild to moderate reaction		Action	
Symptoms: Includes one body system only Examples: • Itchy or runny nose • Itchy mouth • A few hives (mild itch) • Mild nausea or discomfort		For mild symptoms from a single system area, follow the directions below: • Stay with student • Give antihistamine if ordered by a healthcare provider. • Alert emergency contacts • If symptoms spread or worsen → give epinephrine. For more than one symptom, give epinephrine.	
Red: severe reaction		Action	
Severe symptoms • Symptoms in more than one body system • Trouble breathing, wheezing, or repeated coughing • Tight, hoarse throat or trouble swallowing • Swelling of lips or tongue • Pale or blue skin • Fainting, weak pulse, or dizziness • Repeated vomiting or severe diarrhea • Confusion or sudden behavior change		1. Give epinephrine NOW 2. Call 911 say "student is experiencing severe anaphylaxis" Then: • Lay student flat and keep warm • If vomiting or struggling to breathe, allow side-lying or upright position • If not better in 5 minutes → give second dose (if available) • Stay with student • Notify emergency contacts • Student must go to the emergency department	
IMPORTANT • Epinephrine is the first treatment. • Do not delay. • Do not use antihistamine instead of epinephrine. • When in doubt, give epinephrine.			
Individual care notes:			

Medication authorization: (Prescriber to complete)

Medication	Dose:	Route:	Indication:	Frequency/ repeat instructions:	Special instructions:
Epinephrine:					
Antihistamine:					
Bronchodilator:					
Other:					

The above-named student is under my care with a medical diagnosis of _____.

- ☐ Full Independence (Self-Carry & Self-Administer): It is medically appropriate for the student to carry and administer their own epinephrine.
- ☐ Limited Independence (Self-Carry Only): It is medically appropriate for the student to carry their epinephrine, but school staff must administer it.
- ☐ Restricted (Clinic/Office Storage): It is NOT medically appropriate for the student to self-carry. Medication must be stored and administered by designated school staff.

Note: If the student also has asthma, please complete an asthma action plan in addition to this form.

Additional orders (if any):

Date:

Parent / guardian authorization**Self-carry and self-administration**

Utah law allows a student to carry and self-administer prescribed epinephrine when authorized by both the parent or guardian and the healthcare provider.

Select one:

- ☐ Full independence: Self-carry and self-administer
- ☐ Limited independence: Self-carry only (assistance required for use)
- ☐ Restricted: Medication should be stored and administered by designated school staff only

Note: If parent and provider selections differ, the more restrictive protocol will be followed for student safety.

Authorization and responsibilities

I give permission for the school nurse and trained designated school personnel to administer epinephrine according to the Emergency Action Plan.

I understand that:

- Epinephrine must be provided in the original pharmacy-labeled container with the student's name and dose.
- I am responsible for replacing the medication before it expires and within 2 weeks if used.
- I will notify the school nurse of changes to diagnosis or medication.
- 911 will be called after epinephrine is given.
- Information may be shared with school staff on a need-to-know basis as permitted under FERPA.
- This authorization is valid for the current school year unless revoked in writing.
